A North American Contractor's Perspective on Dry-Suction Excavation

Mike Bultje, Business Development, Ox Equipment

Bultje joined Ox Equipment in 2016, after two years at its parent company, Super Sucker Hydro Vac, one of the largest hydrovac service providers in Southern Ontario, and previous experience in construction materials sales. His industry knowledge has helped Ox Equipment deliver new *dry*-suction excavation technologies from Europe's MTS into the North American

Verifying Geopolymer Liner Performance

Steve Henning, Technical Director, Vortex Companies

Introduction to SippSteel

Kent Weisenberg, CEO/CTO, SippTech

Weisenberg has piloted and championed sprayed-in-place pipeline (SIPP) technology for nearly 25 years, designing, engineering and implementing robotic devices for the pipeline rehabilitation industry. As the sole-named inventor on 42 U.S. and foreign patents, he currently has 19 patent applications in process. He also serves as both chair and member on ASTM and AWWA standards committees.
