What do I mean by weeds?

RED LINES

What do I mean by weeds?

RED LINES

These “weeds” build each tree ring.

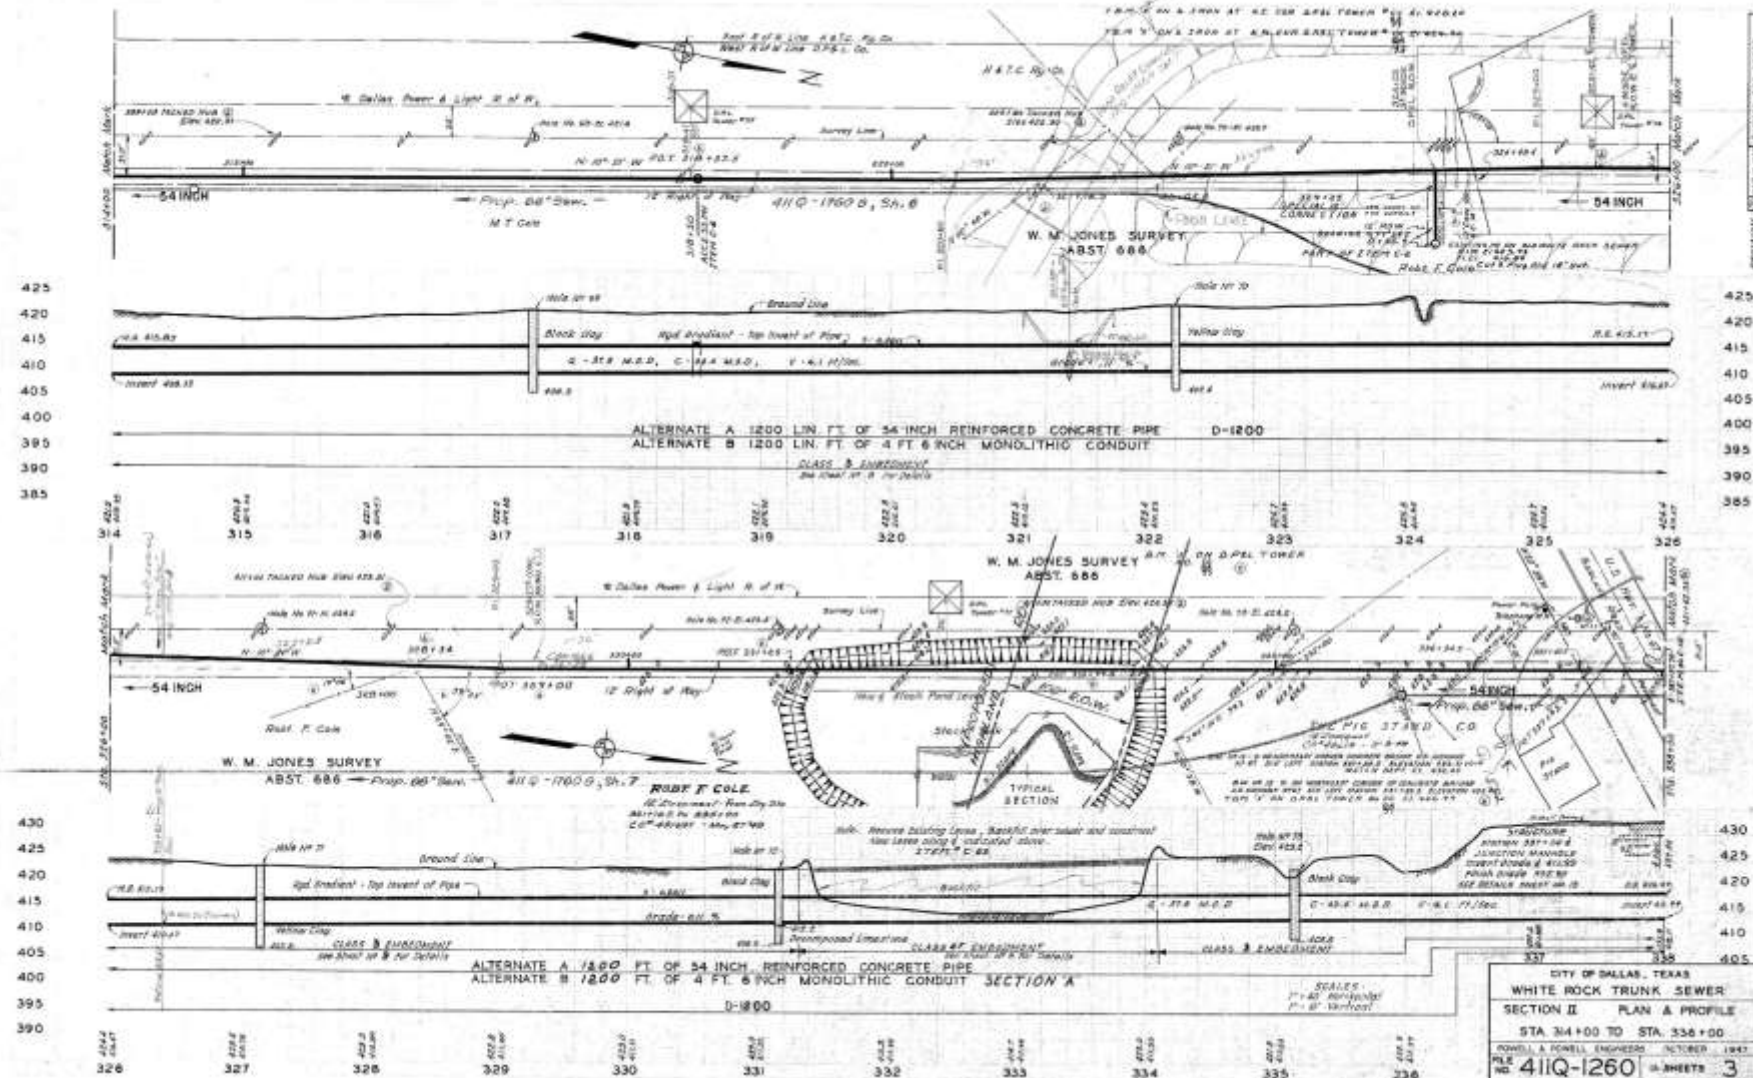

Grow your project like trees, not weeds

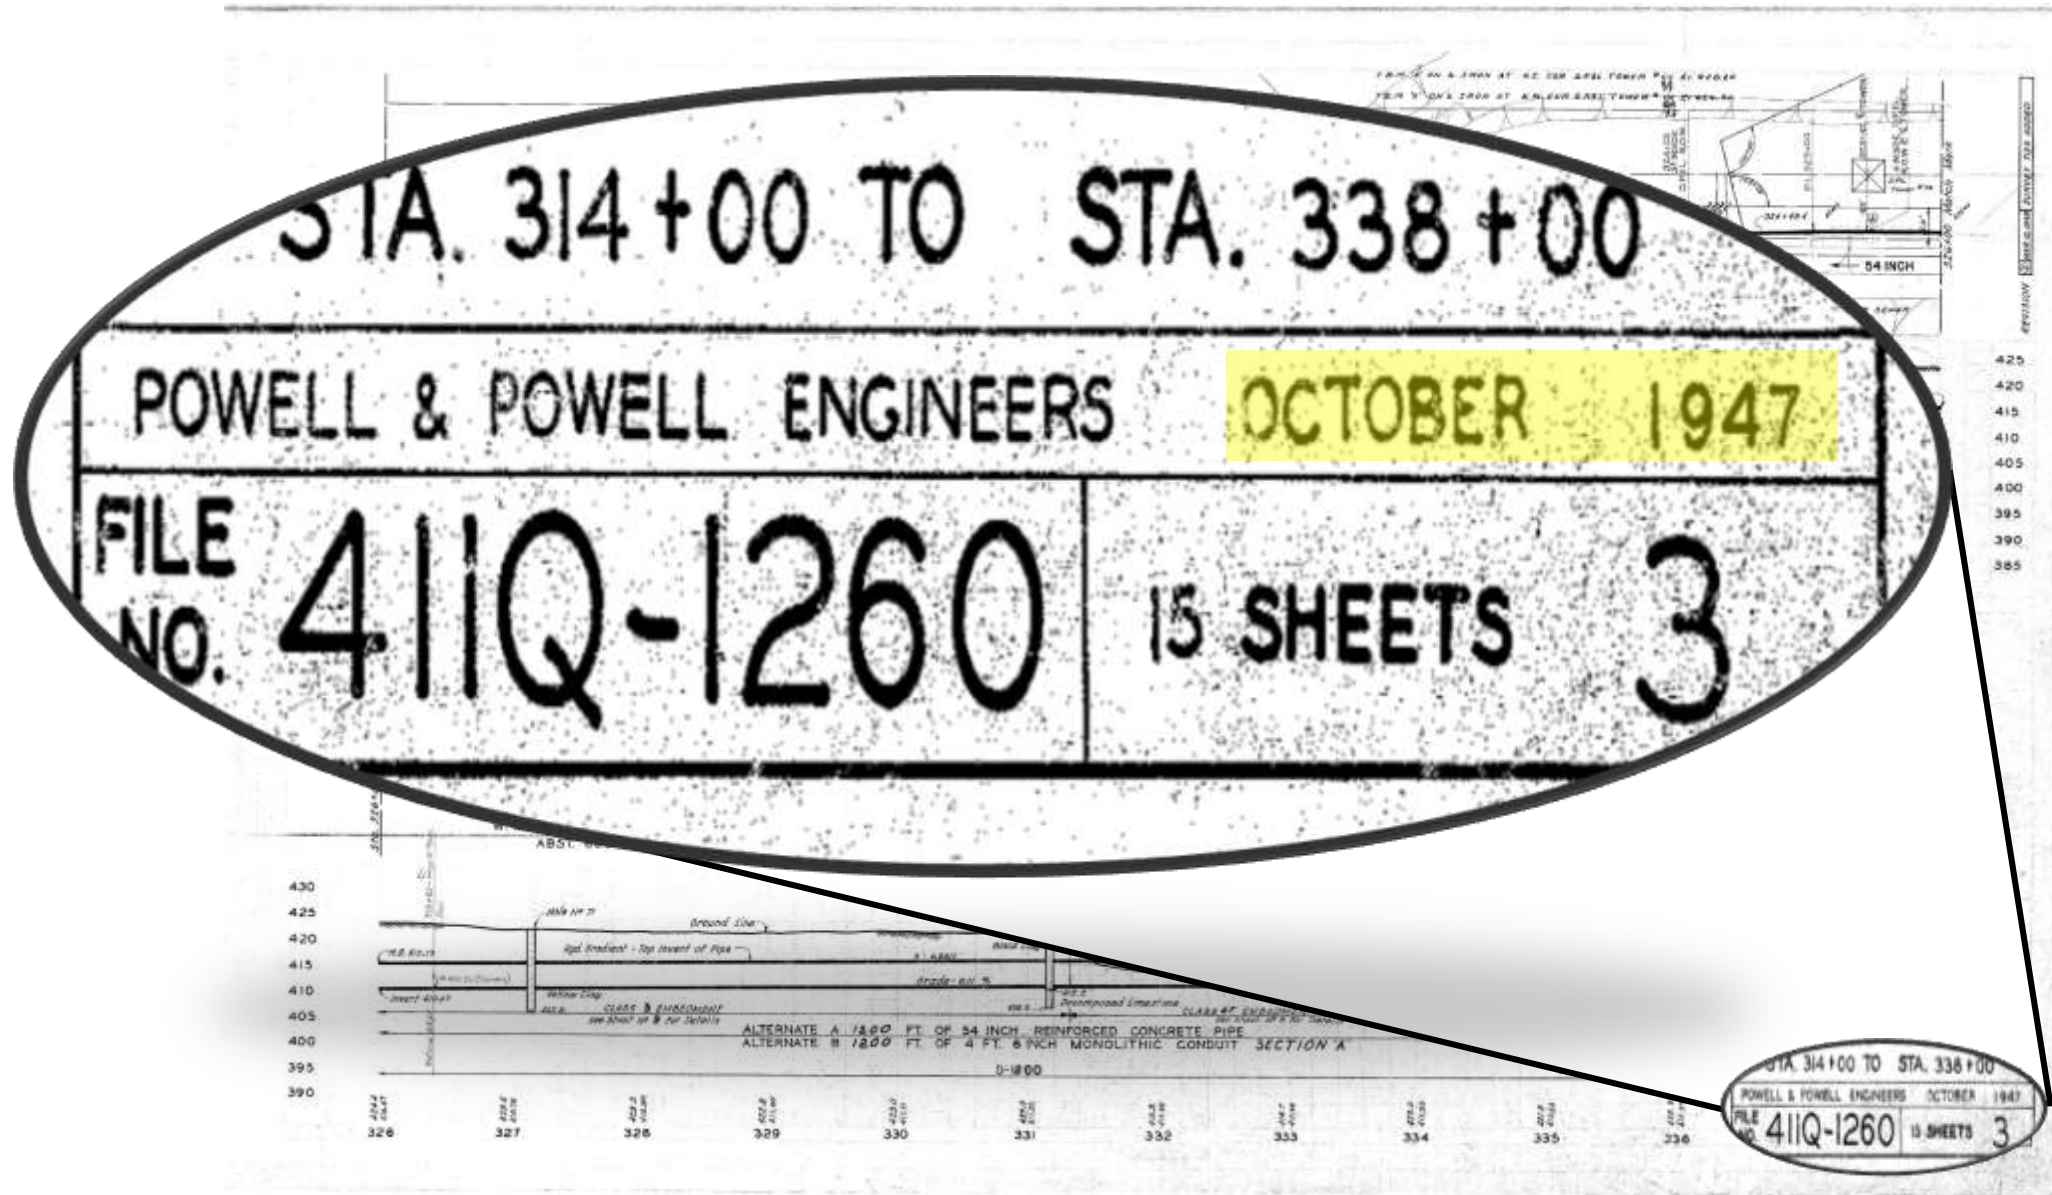

- We design Assets!!
- How do we fit into this projects?
- How do we design assets well?
- Couple proofs

Municipal Projects last for years to come.

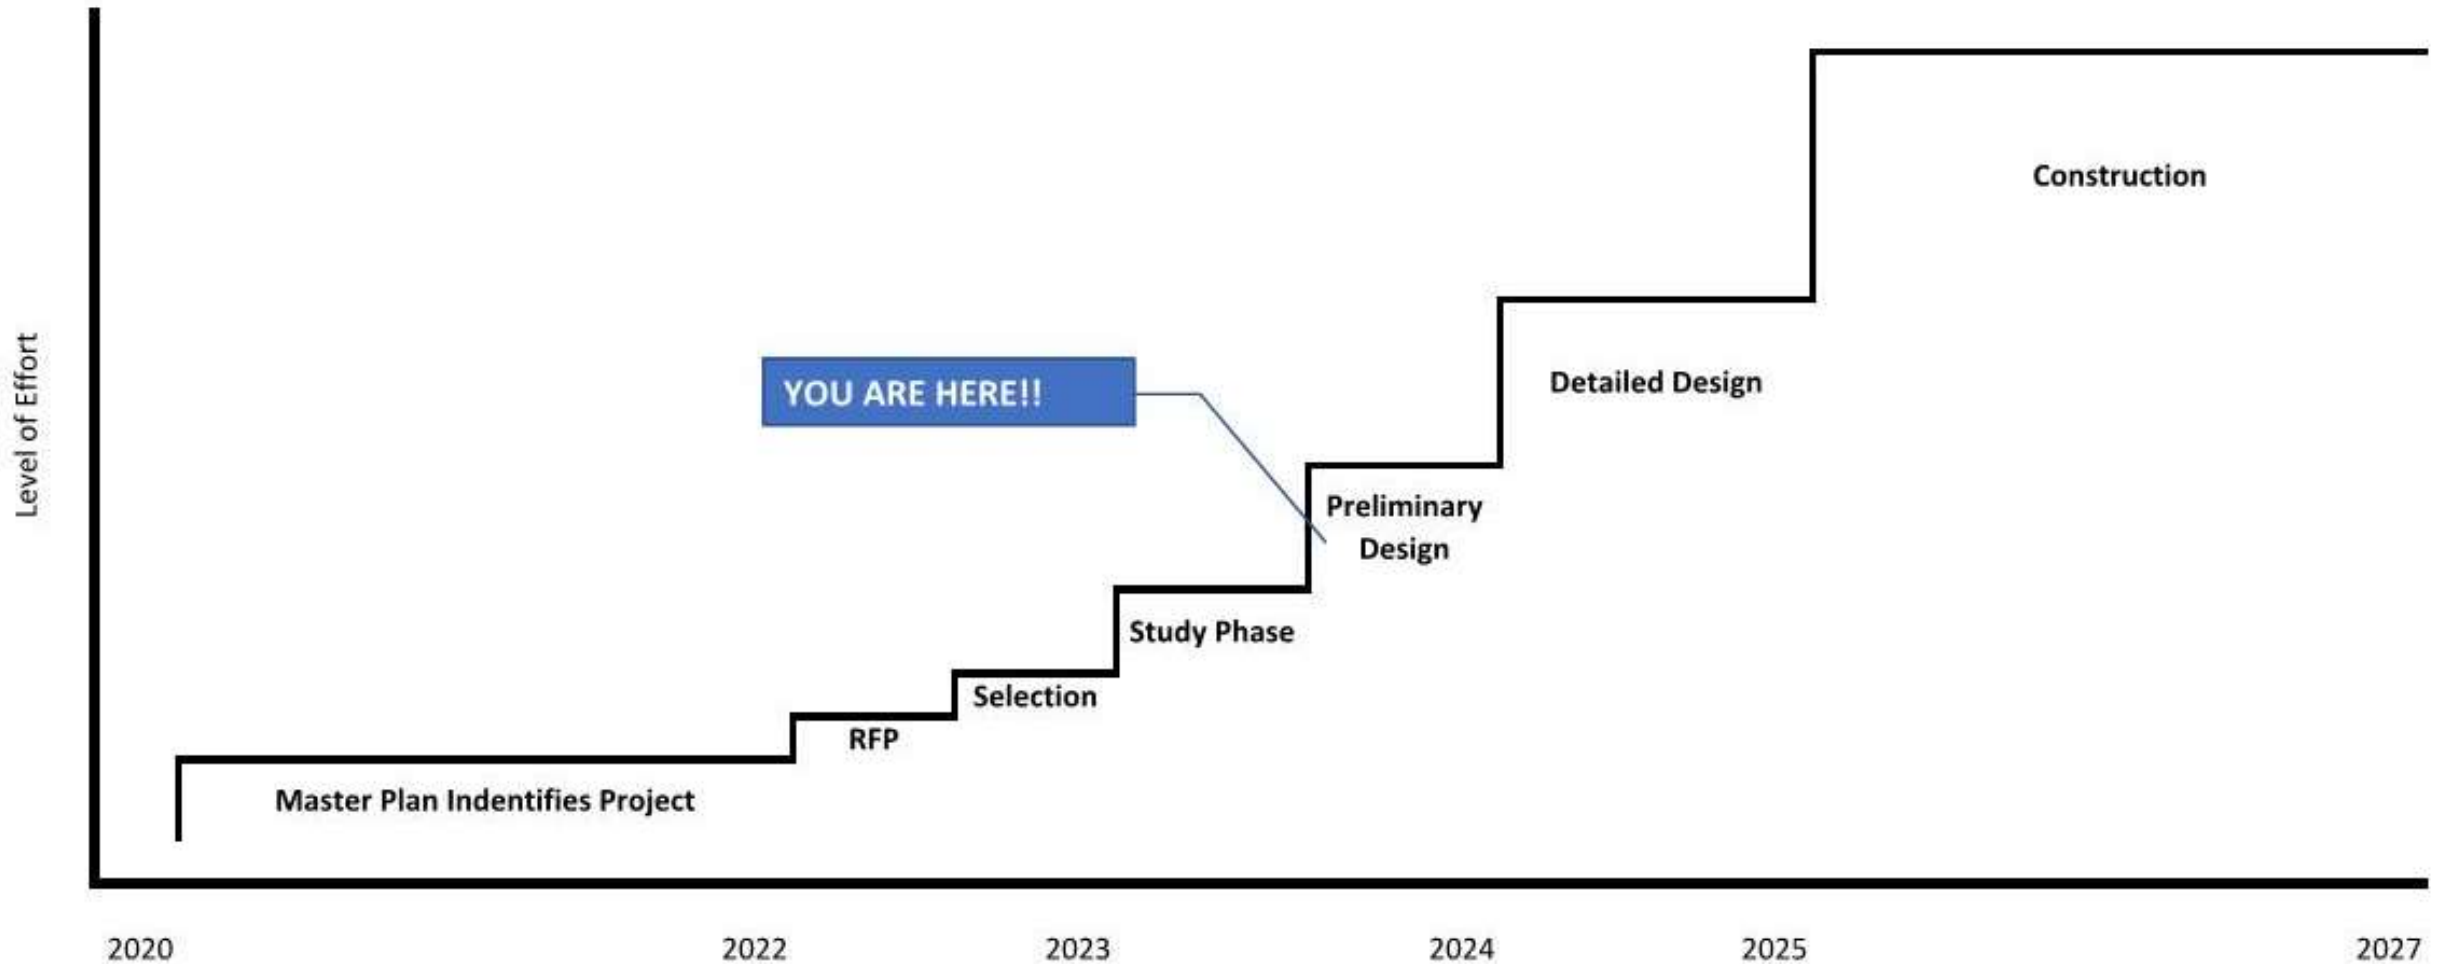

Municipal Projects last for years to come.

People depend on these projects daily

Our projects are measured in years and not days.

Municipal project can have significant cost.

Our projects become assets!!

Every project has a project team.

Every project has a project team.

The real project team is seen here.

We work for many clients...

No task is too small and all are required.

We are too smart and have too many resources to guess.

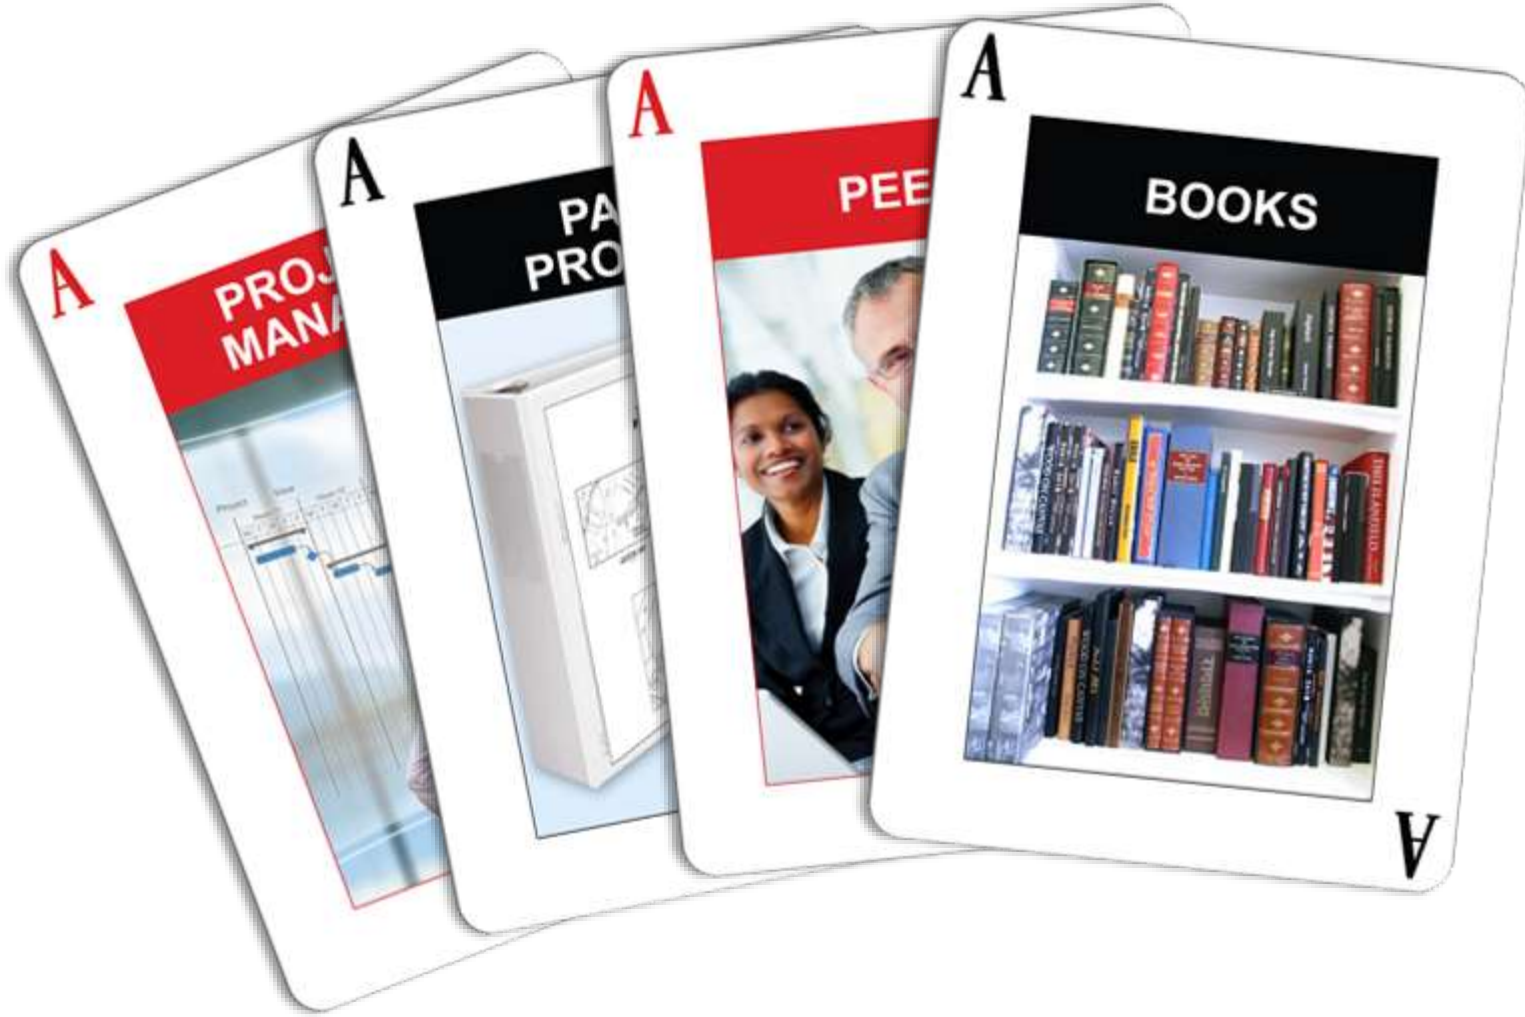

We are too smart and have too many resources to guess.

We are too smart and have too many resources to guess.

We are too smart and have too many resources to guess.

We are too smart and have too many resources to guess.

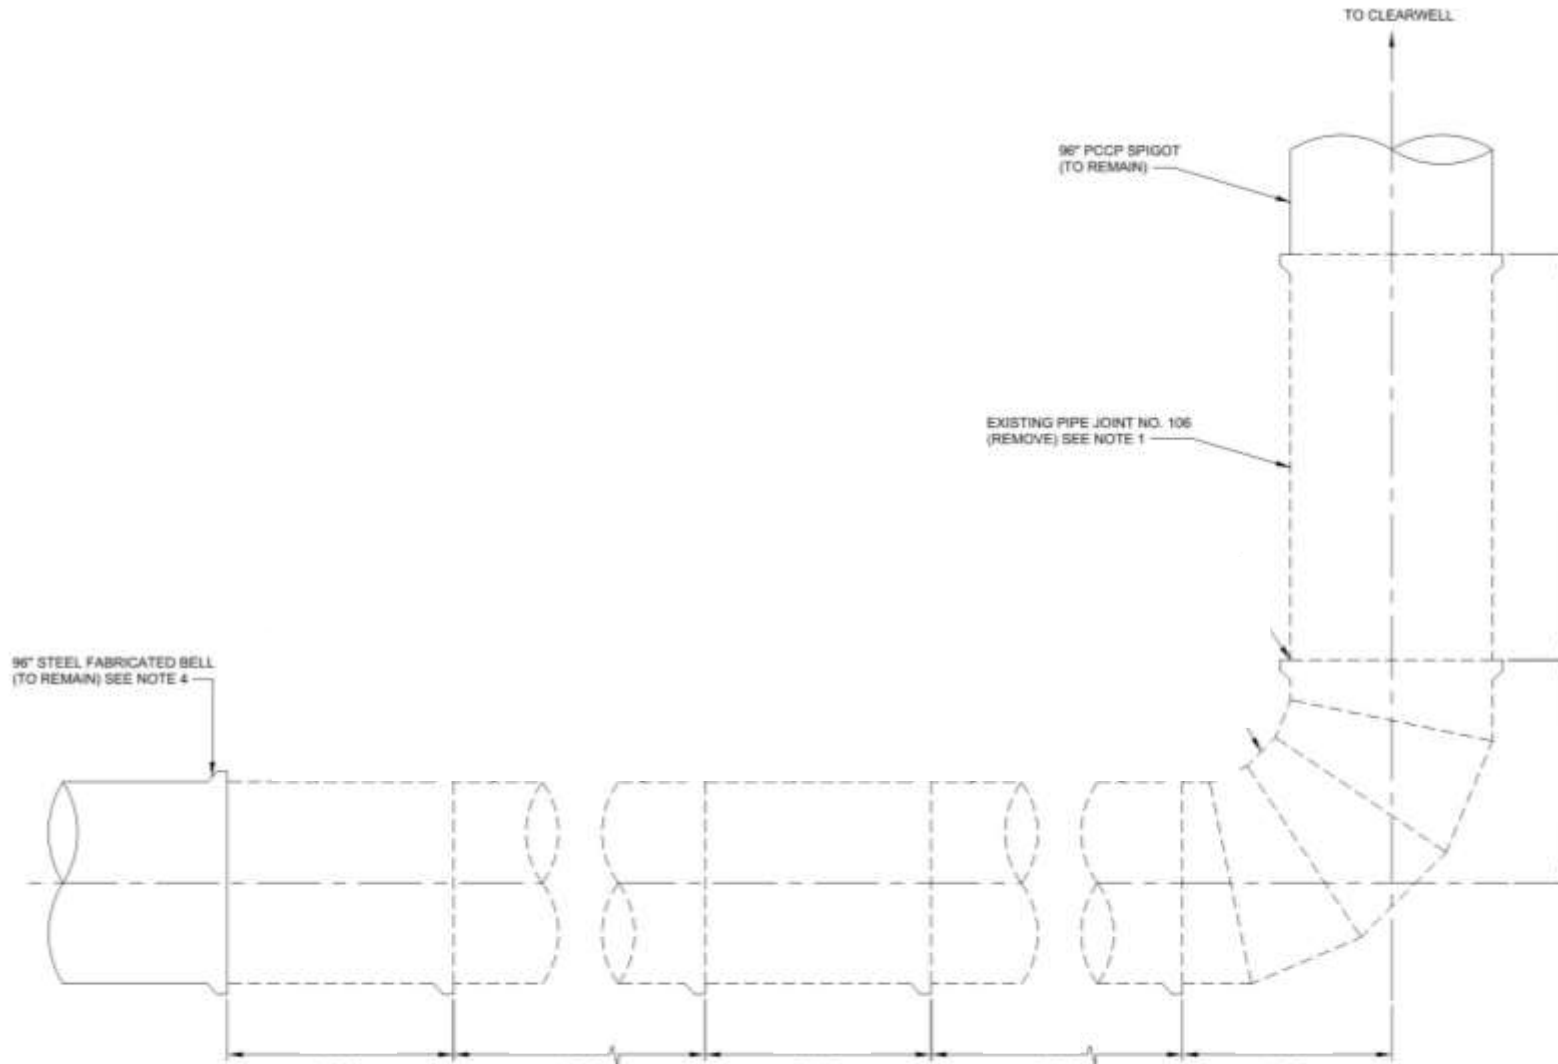

We are too smart and have too many resources to guess.

Few pointers to consider

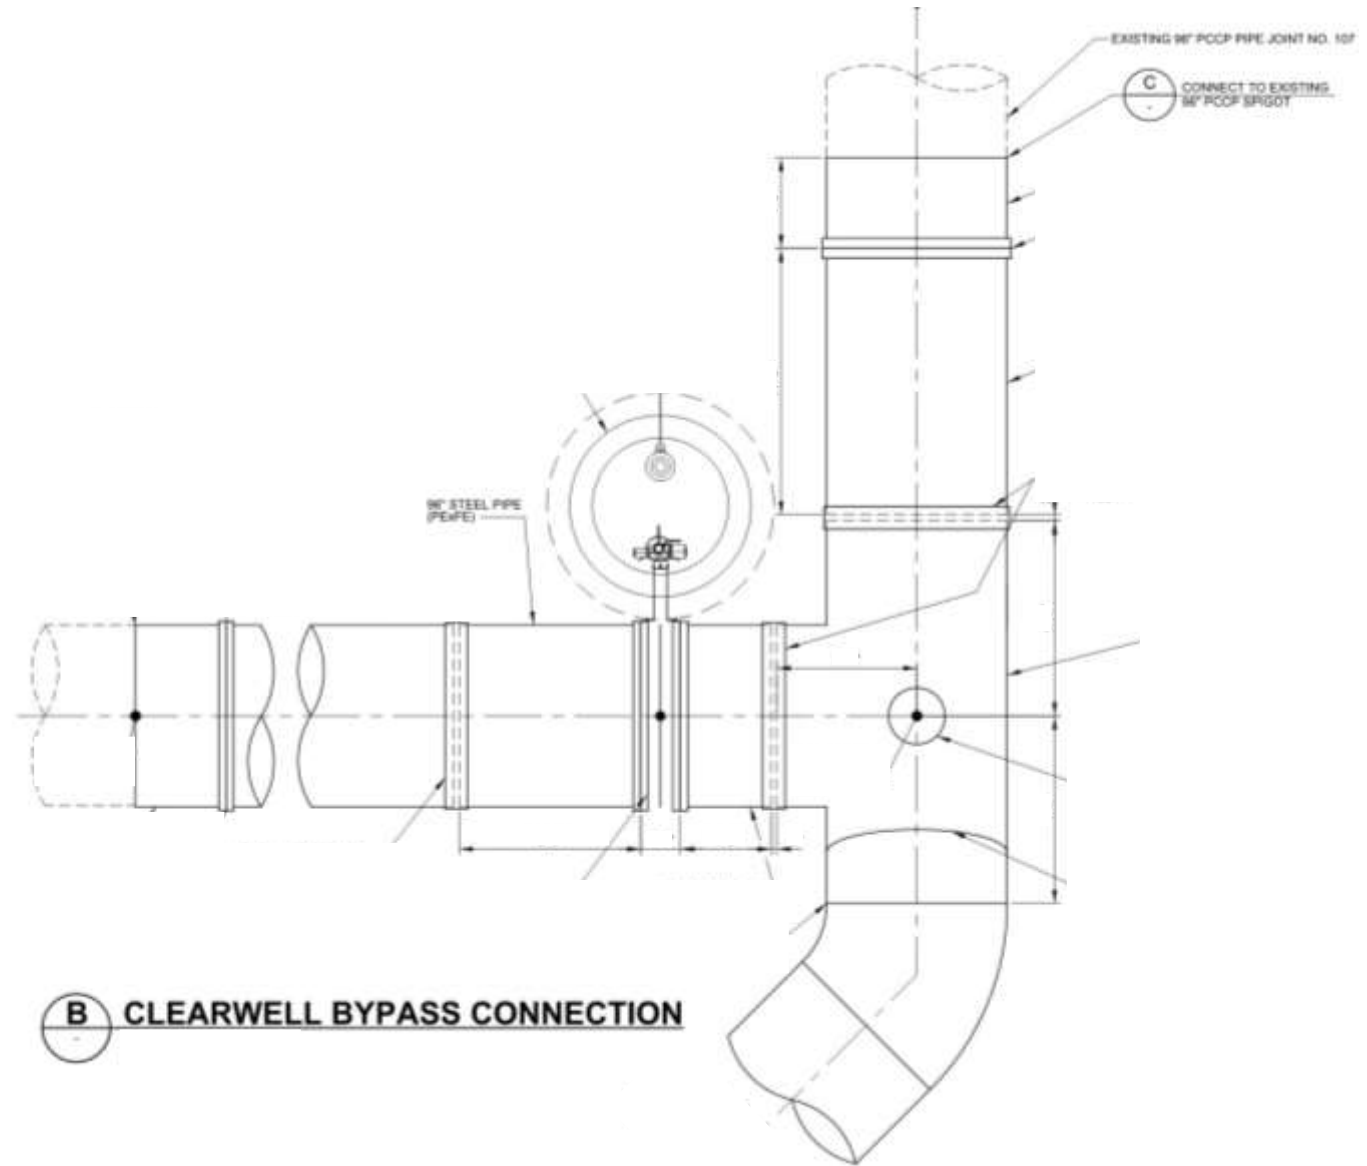

See how these resources were used in action.
