

TRACK X-B=Emerging Technology SPEAKERS

8:30-8:55 Basalt Fiber Reinforcement Eradicates Corrosion Concerns in Concrete Pipe

Fred Tingberg, Principal, Technicon Consulting Group

Fred has 40 years of experience in construction materials selection, specification and installation throughout North America.

He has been recognized for construction materials development, education and training along with project management and oversight. His published white papers on emerging construction methods, materials, and trenchless rehabilitation include trade affiliations with ASCE, NASTT, AWWA, APWA, UCT and NASSCO.

9-9:25 Monoform+ and Monoform HEX

Mike Ingham, Chief Sales Officer, HK Solutions Group

Mike joined HK Solutions Group in 2016 with over 20 years of sales experience in the industrial cleaning industry. He was promoted to director of Sales in 2018 and was most recently promoted to Chief Sales Officer in late 2019.

He works with each of HK Solutions' business development directors and regional account managers, helping grow sales and customer relationships across all territories and service lines.

9:30-10 Composites: The Future of Manhole Covers

Chad Nunnery, Founder, Owner & President, Composite Access Products

After graduating from Dartmouth College with Engineering & Chemistry degrees, Chad started his career. Recognizing that composites would solve many traditional manhole cover problems - inflow, SSOs, theft, corrosion, weight, data transmission - he formed CAP, located in McAllen, TX.

Now used in over 400 municipalities and 45 states, CAP won the 2020 Award for Composites Excellence (ACE) from the ACMA and was acknowledged by Fulton County, Ga., as key to eliminating sewer spills.
